

Worship In God's Presence

Description

[RG AUDIO 022022](#)

Revelation 19:4-9

Worshiping God is one of the most empowering experiences. One day at the church my husband was playing the piano and I began to sing. It was already late and we thought nobody would come to the service. While we sang, we felt God's presence listening to our worship. A faithful couple who never misses the middle week service came late and heard our song from the outside. She told her husband: "the service has already started," because they heard a crowd singing inside the sanctuary. They were surprised to see only my husband and me singing with all our hearts to God. I believe that they were able to hear angels joining us in a powerful and transformative worship experience.

What a glorious day that will be, when with one voice we, His children, will shout Hallelujah! Praise God! We are going to be transformed into His perfect image, we will experience a transformative and glorious moment when the bride, His Church, finally meets the bridegroom, the Lamb of God sitting on His throne of glory. Hallelujah! Amen!
